Please identify what you consider to be the strengths of the course.

Comments
The strength of the course is the video materials
I'm using the updated the text book and the course content.

Please identify one or more areas where you think the course could be improved.

Comments
I think the instructor should do atleast one real life task on each module because of the students who are new to coding.
use the latest version of the text book to match the latest version of VC
